Game Programmer and graduate in Design and Development of Video Games and Virtual Environments from UDIT, with a background in Unity and Unreal Engine and programming experience in C# and C++. I bring adaptability, problem-solving skills, effective communication, multilingual capabilities and creativity to the team. I am a team player, eager to take on challenges and develop new skills.

EDUCATION

[University of Design Innovation and Technology \(UDIT\), Madrid](#): Bachelor’s Degree in Design and Development of Video Games and Virtual Environments

Sept 2022 – Jun 2026

- Developing my expertise across programming and game prototyping.
- **Key modules:**
 - Curricular Internship – Programming Track (10/10)
 - Advanced Web Design (10/10)
 - Video Game and Virtual Environment Development Technologies III (9.85/10) — Awarded highest distinction (“Matrícula de Honor”)
 - Concurrent Programming for Video Games (9.5/10)
 - Advanced Artificial Intelligence (9.13/10)
 - Project Workshop III (9.15/10)
 - Databases (8/10)
 - Physics (8.5/10)

[Virgen de Atocha School, Madrid](#): Bachillerato Científico Técnico (Scientific-Technical Baccalaureate)

Sept 2020– Jun 2022

- **Subjects:** Mathematics, Physics, English, Literature, History, Technical Drawing

WORK EXPERIENCE

[Futura Vive Technologies](#), Videogame Programmer Intern, Madrid

Nov 2024 – Feb 2025

- Contributed to the programming and design of minigames and VR/multiplayer projects using Unity.
- Developed interactive mechanics, hand tracking features, and room creation systems for Oculus VR.
- Implemented JSON-based save systems for persistent game data.
- Supported cross-platform synchronisation to ensure consistent gameplay across devices.
- Assisted with UI integration and accessibility features for improved user experience.

[New Personal](#), Events Waiter, Madrid

Jun 2023 – Dec 2023

- Developed strong interpersonal and problem-solving skills by working with clients in high-pressure environments.
- Demonstrated resilience and adaptability, ensuring high client satisfaction.
- Strengthened organisational and multitasking skills, directly transferable to managing multiple priorities as a programmer.

LANGUAGES AND ENGINES

Languages: C# (4 years), C++ (3 years), JavaScript (1 year), Html (2 years), CSS (2 years), Python (3 month)

Engines: Unity (4 years), Unreal Engine (4 years), Construct (1 year)

PROJECTS

- “Cloud Walker” (Programmer) (2026)
- [“Erebus-Nyx”](#) (Programmer) (2025)
- [“Dude I”](#) (Lead Programmer) (2024)
- [“Rocket Land”](#) (Programmer) (2023)
- [“Metal y Plomo”](#) (Programmer) (2022)

ONLINE COURSES

- [Harvard – CS50’s Introduction to Computer Science](#)
- [Complete Unity 3D Developer Megacourse: Design & Develop 3D Unity games From Scratch](#)
- [Unity Multiplayer Developer: Make Online Games Using Unity’s NGO Framework](#)
- [C++ Fundamentals: Learn Game Programming](#)

EVENTS AND HACKATHONS

- HackForGood VIII Ed. Telefónica (Oct 2023)
- Hackathon CASA VALONIA (Apr 2023)
- Winner of I Ed. Design Day UDIT (Nov 2022)

LANGUAGES

- **Spanish:** Native
- **English:** B2 Cambridge Certificate (2021) and ongoing advanced practice and use during university studies.

VOLUNTEERING

- ECOALF Foundation. Removal of Alianto, an invasive plant species, in Soto de las Juntas.
